ALMOND EXFOLIATOR

INCI: *Prunus Armeniaca* seed powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Almond Exfoliator is crafted from almond shells harvested in Sicily, Italy, between early June and late July. After being processed for the food industry, the shells are repurposed into high-quality cosmetic ingredients.

The natural brown colour of these exfoliants adds authenticity to formulations, offering excellent abrasiveness and stability, with an abrasiveness index between 3 and 4.

Rich in oils, proteins, and vitamins, sweet almonds have been valued for their soothing and nourishing properties, making these microparticles ideal for gentle and luxurious exfoliation.

APRICOT EXFOLIATOR

INCI: Prunus Amygdalus Dulcis shell powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Apricot Exfoliator is manufactured from apricot kernels. Prunus armeniaca (meaning Armenian plum), the most commonly cultivated apricot species, also called anzu apricot, Siberian apricot, Tibetan apricot, is a species of Prunus, classified as the plum in the subgenus Prunus. Originally from the northeast of China, apricot has been cultivated for almost 4.000 years.

Archetypal summer fruit, Apricot is a synonym of sun, holidays and delicacies.

These microparticles refine the skin and tone it.

ARGAN EXFOLIATOR

INCI: Argania Spinosa shell powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Inspired by the age-old traditions of hammams, our Argan Exfoliant is a cherished beauty secret from the Orient, designed to leave skin soft, supple, and revitalized. It deeply cleanses, removing impurities and dead skin cells for a refreshed, glowing complexion.

Sourced from Morocco - harvested and produced by women's cooperatives in the Agadir region, a UNESCO-protected area -, our argan kernel exfoliant offers gentle exfoliation, making it perfect for delicate skin.

BAMBOO CRUMBLE EXFOLIATOR

INCI: Bambusa Arundinacea stem extract

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Bamboo Crumble Exfoliator is a 100% natural powder obtained from Bambusa arundinacea stems through a sustainable upcycling process. Its particles, ranging from 100 to 1000 microns, ensure a gradual and self-adjusting exfoliation: during application, they first remove impurities and dead cells with precision, then naturally disintegrate into an ultra-fine powder that leaves the skin purified and with a soft mattifying finish.

This smart crumble texture evolves during massage, delivering a tailor-made exfoliating experience that adapts in intensity and feel — for effective yet gentle exfoliation, perfectly suited to both skin and scalp care.

A SMART & ADAPTIVE EXFOLIANT FOR A UNIQUE SENSORIAL EXPERIENCE

Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Bamboo Exfoliator is a natural exfoliating ingredient manufactured from the nodes of bamboo stems, a reference of herbs and spices range. Bamboos are evergreen perennial flowering plants in the subfamily Bambusoideae that include some of the fastest-growing plants in the world, due to a unique rhizome-dependent system.

Some bamboo species are known to exudate natural silica. This substance which is known in traditional Indian medicine as Tabasheer, contains more than 75% of silica. It is an essential product for many cosmetic applications. Its soft and silky feel, its high absorption capacity and its mattifying power are remarkable.

BITTER ORANGE EXFOLIATOR

INCI: Citrus Anrantium Amara peel powder

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Bitter Orange Exfoliator is a natural exfoliant derived from the peels of bitter orange, that are rich in essential oil known for its toning properties, along with bioflavonoids and vitamin C that offer strong antioxidant benefits.

These bioflavonoids have demonstrated powerful effects in improving capillary permeability, making them a valuable addition to skincare formulations.

After grinding, the particles are carefully sieved to create exfoliating grains of varying sizes, ranging from 1000 to 200 µm.

APPLICATIONS

Not stable in aqueous forms.
Should be used in anhydrous forms only.
Easy to maintain in suspension.

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Blackcurrant Exfoliator is a natural exfoliant crafted from blackcurrant seeds, renowned for their antioxidant properties, thanks to their rich anthocyanin content. Beyond their health benefits, these vibrant red fruits bring a natural touch of colour and sweetness to your formulations.

These exfoliants are ideal for use in anhydrous cosmetic formulations, though it's important to note that the particles may alter the product's colour.

CELLULOSCRUB L

INCI: Cellulose Acetate

PROPERTIES

CelluloScrub™ L is an innovative white exfoliating scrub that matches the high performance of traditional polyethylene (PE) beads, offering a more sustainable and eco-friendly alternative. Sourced from wood pulp, CelluloScrub™ L is made of modified cellulose, providing the personal care industry with a renewable and biodegradable ingredient.

The cellulose used in its production is derived from certified sustainable forests, ensuring there is no negative impact on land overexploitation.

This biodegradable material is recognized for its proven ability to break down in environments such as wastewater treatment plants. In addition to its environmental benefits, CelluloScrub™ L mirrors the performance of PE beads, including its abrasiveness, and suspension capacity, while maintaining stability in various cosmetic formulations without impacting the product's pH or colour.

THE MOST SUITABLE NATURAL ALTERNATIVE TO PE MICRO PARTICLES

CHERRY EXFOLIATOR

INCI: *Prunus Cerasus shell powder*

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Cherry Exfoliator is a natural exfoliant derived from upcycled cherry kernel shells.

It is 100% upcycled: cherries are harvested and pitted for jam production, and the kernels are then crushed to extract starch for cherry oil. The remaining kernel shells is grinded into fine particles. These particles are then carefully sieved to produce exfoliants. This process ensures that every part of the cherry is utilized, minimizing waste.

CLEANSCRUB

INCI: Zea Mays Cob powder

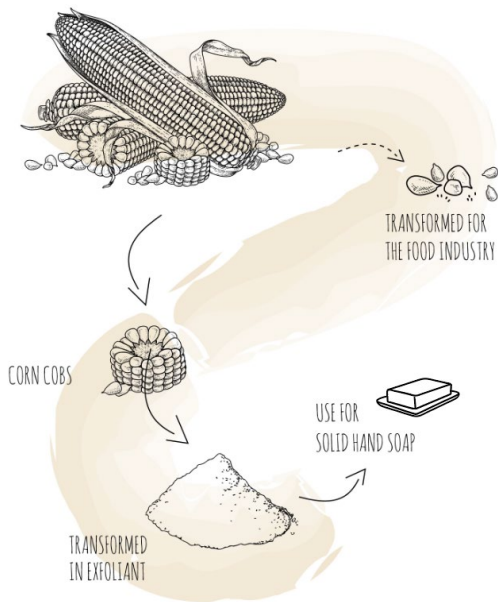

PROPERTIES

Cleanscrub is an exfoliating cleaning product made from corn cob harvested in France. It is then crushed and sieved in our machines.

Cleanscrub has been designed for the manufacture of liquid hand soaps. It's ideal for workshops and industries requiring effective, frequent hand washing. It can also be used to make solid soaps and shower gels.

The structure of the Cleanscrub is made up of a multitude of cavities, which explains its high absorption capacity for fatty compounds, for effective hand cleansing.

The particle size and abrasiveness of Cleanscrub is gentle enough to protect users' skin.

COCONUT EXFOLIATOR

INCI: Cocos Nucifera shell powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Coconut Exfoliator is derived from the crushed shells of coconuts. After the membranous fibers are removed, the hard shell is ground into a fine powder, offering excellent exfoliating properties while being gentle on the skin, ideal for stimulating epidermal renewal.

Coconuts, native to the tropical regions and a symbol of the tropics, are harvested throughout the year in the warm, sunny climate of Ben Tre province, Vietnam.

The fruit is first used by the food industry (for juice, oil, etc.), and then the shells are upcycled into cosmetic exfoliants.

COCONUT PULP EXFOLIATOR

INCI: Cocos Nucifera fruit powder

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Coconut Exfoliator is a natural exfoliant derived from coconut pulp. Coconut is widely used for its gustatory qualities but also for its cosmetic virtues. Native to the tropical regions, they are harvested throughout the year in the warm, sunny climate of Ben Tre province, Vietnam. The fruit is first used by the food industry (for juice, oil, etc.), and then the shells are upcycled into cosmetic exfoliants: Once rid of its membranous fibers, the shell is crushed to obtain a powder.

These delicious exfoliating particles are ideal for gently exfoliating the skin and stimulating skin renewal. They tone the skin by providing a film-forming action. Its natural coconut fragrance is ideal for scenting products.

APPLICATIONS

Not stable in aqueous forms.
Should be used in anhydrous forms only.
Easy to maintain in suspension.

COFFEE EXFOLIATOR

INCI: Coffee Arabica seed powder

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Coffee Exfoliator is manufactured from roasted coffee beans. Coffea is a genus of flowering plants in the family Rubiaceae. Coffea species are shrubs or small trees native to tropical and southern Africa and tropical Asia. The fruits most commonly contain two stones with their flat sides together. The seeds of some species, called coffee beans, are used to flavor various beverages and products.

The coffee beans are finely ground and sieved to obtain the ideal exfoliating particles. This exfoliant eliminates dead cells, smoothens out irregularities and revives the complexion radiance without irritating the skin, leaving it looking young, radiant and silky.

APPLICATIONS

Not stable in aqueous forms.
Should be used in anhydrous forms only.
Easy to maintain in suspension.

CORINDON EXFOLIATOR

INCI: Alumina

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Corindon Exfoliator is manufactured from corundum, a crystalline of aluminum oxide. It is naturally clear, and the transparent specimens are used as gems (ruby, sapphire). Its coarse and uneven surface allows accurate and efficient microdermabrasion.

Corundum is a mineral found in metamorphic rocks like mica schist, gneiss, and marble, as well as in low-silica igneous rocks such as syenite. It also occurs in ultramafic rocks, lamprophyre dikes, and pegmatites. Due to its hardness, it often appears in stream and beach sands as a detrital mineral. It does not trigger allergic reactions and is not absorbed by the skin.

Exfoliators

CRANBERRY EXFOLIATOR

INCI: *Vaccinium Macrocarpon* fruit powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Cranberry Exfoliator is a natural exfoliant made from cranberry pomace. It is a 100% upcycled ingredient. The cranberry berries are pressed to be transformed into juice. We then recover the residue of pressing: the cranberry pomace. After a process of grinding, sieving and sterilization, we obtain an exfoliating powder ideal for cosmetic applications.

Subjected to rigorous climatic conditions, the cranberry reinforces the protection of the skin. Polyphenols and tocotrienols act in synergy for a powerful well-ageing activity, while omega 3 and omega 6 fatty acids reinforce the hydrolipidic film of the skin. The cranberry grows in difficult climatic conditions in Canada.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Ginger Exfoliator is a natural exfoliant made from the ginger plant's rhizome, known for its rich active compounds. The phenolic compounds, gingerols, and shogaols, present in the rhizome provide antioxidant and vasodilating properties.

Ginger is a flowering plant widely used as a spice and in folk medicine, with a history dating back to its domestication in Island Southeast Asia. Transported across the Indo-Pacific by the Austronesian peoples, it was one of the first spices to reach Europe, used by ancient Greeks and Romans.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Grape Exfoliator is a natural exfoliant crafted from grape seeds, ideal for enhancing your exfoliating products. Grape seeds are rich in antioxidant polyphenols, including OPCs, anthocyanins, and biflavonoids, which are known for combating free radicals that contribute to the ageing of skin's structural components.

Grapevine is native to the Mediterranean region and parts of Europe and Asia. After being crushed, the grape seeds are sieved to produce exfoliating particles of various grain sizes, making them perfect for precise and effective scrubbing. The grape seeds' natural resilience makes them particularly well-suited for creating strong exfoliating products, ensuring a thorough and refined exfoliation.

These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Grape Seed Exfoliator is a natural scrub made from upcycled grape seeds sourced from an organic vineyard in the Anjou region.

The seeds are cold-pressed to extract high-quality oil, and the remaining press residue is transformed into finely ground exfoliating particles.

These particles offer gentle mechanical exfoliation, perfect for removing dead skin cells and promoting cell renewal. Rich in polyphenols, this exfoliant also protects the skin against free radicals, helping to prevent signs of ageing and maintain a radiant, youthful appearance.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Kiwi Exfoliator is crafted from the seeds of kiwifruit harvested in Shaanxi, China. In collaboration with local producers, we recover these seeds after the kiwifruit is processed into juice for the food industry, transforming these by-products into high-quality cosmetic ingredients.

Rich in omega-3 and omega-6 fatty acids, kiwi seeds are renowned for their potent well-ageing properties, helping to fight the signs of ageing while revitalizing the skin. Additionally, they contain significant amounts of potassium and magnesium, further enhancing their revitalizing effects.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Lemon Exfoliator is a natural exfoliant derived from lemon peel, celebrated for its strong astringent and antioxidant properties.

This exfoliant effectively tightens pores, reduces blemishes, and enhances skin radiance, making it an ideal choice for well-ageing skincare routines.

The citric acid and vitamin-rich content in lemon peel revitalizes dull and tired skin, promoting a youthful glow and smoother texture. By boosting radiance and supporting well-ageing, Lemon Exfoliator adds a natural vibrancy to formulations.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Lichen Exfoliator is a natural scrub made from the red algae *Chondrus crispus*, part of the Rhodophytes family, harvested along the Breton coast of France.

Primarily used in soap formulations, the exfoliating particles remain easily suspended in the product. Rich in carrageenans, it offers moisturizing and softening properties.

Its brown-beige color comes from the drying process, ensuring good product stability.

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Lithothamnium Exfoliator is manufactured from red calcareous seaweed.

Lithothamnium belongs to the family of red algae. It takes the form of small skeletons resembling coral. These fragile branches are made of limestone impregnated with mineral elements and trace elements (mainly calcium and magnesium), secured from seawater. It presents a prominent porosity which increases the availability of trace elements.

APPLICATIONS

Stable in all formulations, including aqueous formulations, except acid pH.
Easy to maintain in suspension.

LOTUS EXFOLIATOR

INCI: Nelumbo Nucifera seed powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Lotus Exfoliator is made from the seeds of the lotus plant, revered in Asian cultures as a sacred and powerful botanical.

This aquatic plant thrives in slow-moving river floodplains and deltas, where its seeds are known for their remarkable longevity and resilience. Some seeds remain dormant for centuries, reawakening only when favorable conditions return, such as during floods. In fact, the oldest known germination of a lotus seed, dating back 1,300 years, was discovered in a dry lakebed in northeastern China.

Lotus are particularly valued in cosmetics for their astringent and toning properties.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Luffa Natural Exfoliator is a natural exfoliant made from Luffa fibers, which are carefully dyed: a process that enhances the stability of the exfoliating particles while maintaining their natural effectiveness.

Luffa, a genus of tropical and subtropical vines in the cucumber family, is known for producing fibrous fruits that, when fully ripened, become the loofah sponge commonly used for scrubbing. In addition to their exfoliating properties, luffa fibers are prized for their ability to stimulate blood circulation and gently yet effectively exfoliate the skin. The sponge-like texture, with fibers aligned in various directions, ensures a thorough and invigorating scrub.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Olive Exfoliator is crafted from olive stones, part of the shells and kernels range.

The olive tree, native to the Mediterranean Basin, is cultivated globally, from South America to Australia. Its fruit, the olive, is central to Mediterranean agriculture and cuisine, primarily valued for olive oil production.

The olive tree, synonymous with life and hope, is revered as an eternal symbol. Beyond its oil, the olive provides a hidden treasure: its kernel, which, when finely ground, creates a gentle yet effective exfoliant that leaves the skin soft and glowing.

These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Orange Exfoliator is prized for its gentle exfoliation and its ability to infuse products with a light, radiant tint, reminiscent of fresh orange zest, enhancing the overall sensory experience and offering an enriching, revitalizing experience.

The orange tree, an evergreen species known for its symbolism of love, strength, and endurance, produces a fruit that is not only a staple in healthy diets but also a valuable source of essential oil. This oil, extracted from the orange peel, is renowned for its calming, softening, and harmonizing properties.

These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Pearl Exfoliator is crafted from cultured pearls. Composed primarily of calcium carbonate in a crystalline form, pearls are highly valued for their beauty and rarity, often symbolizing something rare, fine, and precious.

Recognized as one of the rarest and most valuable beauty treasures, pearl powder has been cherished by Asian women for centuries.

This luxurious ingredient is rich in minerals, trace elements, and amino acids, renowned for its soothing and revitalizing properties. It enhances skin radiance, detoxifies, and helps diminish the appearance of age spots.

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Pomegranate Exfoliator is a natural exfoliant made from pomegranate seeds, offering gentle yet effective exfoliation that stimulates cell renewal and combats ageing signs, leaving skin refreshed and radiant.

Pomegranate seeds are well adapted for scrubbing. They contain an oil rich in strong anti-oxidant polyphenols and bioflavonoids which fight against free radicals and prevent the skin ageing process. Pomegranate seed oil exhibits a rich fatty acid which gives its anti-inflammatory and moisturizing properties.

QUARTZ EXFOLIATOR

INCI: Quartz powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Quartz Exfoliator is a natural exfoliant made from quartz crystal.

Quartz crystal is used as a precious stone. In ancient Egypt, women wore facial masks sculpted from quartz to soften and beautify the skin. Quartz can be classed as one of nature’s most energizing minerals.

Extremely abrasive, quartz enables precise exfoliation. It promotes skin regeneration by smoothing the epidermis without affecting the hydrolipidic film.

RASPBERRY EXFOLIATOR

INCI: *Rubus Idaeus* seed powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Raspberry Exfoliant is made from crushed raspberry seeds, naturally rich in essential fatty acids, including linoleic acid ($\omega 6$), alpha-linoleic acid ($\omega 3$), and oleic acid ($\omega 9$). These components are crucial for reinforcing the skin's hydrolipidic film, contributing to a healthy and resilient skin barrier.

Raspberries are cultivated extensively across temperate regions worldwide. Their plant is a perennial with biennial canes. In its first year, it produces stems bearing large leaves but not flowers. In the second year, stems develop side shoots producing smaller leaves and clusters of white flowers in late spring. The fruit, a red and sweet yet tart aggregate of drupelets, ripens in summer/early autumn.

RHYOLITE EXFOLIATOR

INCI: Pumice powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Rhyolite Exfoliator is a natural exfoliating ingredient manufactured from lava stones, a reference of minerals range.

Rhyolite is a low-density lava rich in silica (71%) which is formed in the magma of Strombolian volcanoes.

Extremely abrasive, rhyolite allows tonic exfoliation. It is the ideal mineral to regenerate the skin and to smooth down the epidermis without affecting the hydro-lipidic film.

RICE EXFOLIATOR

INCI: *Oryza Sativa powder*

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Rice Exfoliator is made from *Oryza sativa* rice grains, offering a gentle touch that enhances skin texture and hydration.

Rice comes in various colours, such as white, brown, black, purple, and red, with different varieties like the sticky japonica and non-sticky indica. Rice has been a staple in Asian skincare traditions for centuries, used to cleanse and purify the skin.

The finely milled rice powder exfoliates without causing irritation, making it ideal for sensitive skin. Additionally, the moisturizing and emollient qualities of rice leave the skin feeling soft and silky smooth.

RICE HUSK EXFOLIATOR

INCI: *Oryza sativa* hull extract

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Rice Husk Exfoliator is a 100% natural exfoliating agent derived from upcycled rice husks, **naturally concentrated in plant-based amorphous silica**. The material provides a controlled, non-abrasive exfoliating action, ideal for sensitive or frequent-use applications.

Its **intrinsic whiteness**, resulting from the high silica content, offers both aesthetic appeal and formulation flexibility, particularly in systems where visual purity is valued. Unlike crystalline silica, the amorphous form ensures **safe topical use**, with no associated inhalation risks.

The exfoliant is stable, fully biodegradable, and compatible with a wide range of rinse-off and leave-on formats.

ROSA GALLICA EXFOLIATOR

INCI: Rosa Gallica flower

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Rosa Gallica Exfoliator is made from dried rose petals, perfect for adding a touch of elegance to your formulations.

The rose, a symbol of eternal beauty, is especially beneficial for dry and delicate skin.

Rosa gallica, native to Central and Southern Europe and Western Asia, is valued for its fragrant, deep pink flowers and diverse colour variations, ranging from pure white to deep violet and yellow. This deciduous shrub features slender prickles and bluish-green leaves, with flowers that cluster together, sometimes forming double corollas.

ROSEHIP EXFOLIATOR

INCI: Rosa Canina fruit extract

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Rosehip Exfoliator is a natural exfoliant made from the fruit of wild roses, particularly Rosa canina (dog rose). These rosehips, typically bright red or orange, owe their colour to antioxidants like lycopene and flavonoids, which the plant synthesizes to protect against harsh winter conditions.

The exfoliant is created by crushing and sieving the rosehip fruits to achieve the perfect exfoliating particle for skincare formulations. This ingredient pairs well with rosehip oil, known for its protective and regenerating properties.

Exfoliators

SHEA EXFOLIATOR

INCI: Butyrospermum Parkii (Shea) nut shell powder

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Shea Nut Exfoliator is made from finely ground shea nut shells.

Shea trees, scientifically known as Butyrospermum parkii, are native to the savannahs of West Africa, where they have been cherished for centuries. These trees can grow up to 15 meters tall and produce large canopies of dense foliage, characterized by rough, deeply fissured bark and glossy green leaves. The shea nut, technically a seed from a fruit, is highly prized for its rich, nourishing properties.

Shea Nut Exfoliator is an ideal addition to various cosmetic formulations designed for smoother, healthier skin.

APPLICATIONS

Stable in all formulations, including aqueous formulations.
Easy to maintain in suspension.

STRAWBERRY EXFOLIATOR

INCI: *Fragaria Vesca seed*

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Strawberry Exfoliator is a natural exfoliant derived from seed, which oil is celebrated for its well-ageing benefits, rich in antioxidants, tocopherol, and essential fatty acids like linoleic and oleic acids. With its nearly spherical shape, this exfoliant is particularly suited for mature, dry, and damaged skin.

Fragaria vesca, commonly known as wild or woodland strawberry, is a perennial plant from the rose family that thrives across the Northern Hemisphere. The plant produces edible fruits and spreads primarily through runners, with viable seeds that can establish new populations.

SUGAR CANE WHITE EXFOLIATOR

INCI: *Saccharum Officinarum* (Sugar Cane) extract

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Sugar Cane Exfoliant is 100% certified organic by Ecocert Greenlife according to the COSMOS standard.

Sugar grains are essential for exfoliating treatments like scrubs. Their round, spherical shape not only enhances the visual texture of scrub bases but also provides optimal exfoliation for body care products.

We've chosen a medium-white/ivory cane sugar from Brazil, known for its precise granulometry, achieved through the sugar crystallization process.

APPLICATIONS

Not stable in aqueous forms.
Should be used in anhydrous forms only.
Easy to maintain in suspension.

VOLCANIC SAND EXFOLIATOR

INCI: Volcanic Sand

GENTLE EXFOLIANTS
WITH A WIDE VARIETY OF COLOURS AND TEXTURES

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Volcanic Sand Exfoliator is made from lava of an Icelandic volcano.

Iceland is known for its volcanic activity due to its location on the globe, at the boundary of two divergent tectonic plates.

Lessonia’s volcanic sand comes from Krysuvik in Reykjanesskagi, Iceland’s most geothermally active land, which literally means the “peninsula of the smoke cape”.

This black sand with its fine, round, even particles offers natural exfoliation and deep cleansing for soft, radiant skin.

APPLICATIONS

Stable in all formulations including aqueous formulations.
The suspension capacity of the formula should be adapted to the density of the exfoliator.

WALNUT EXFOLIATOR

INCI: *Junglans Regia* shell powder

EXFOLIATORS RANGE

The Exfoliator range from Lessonia offers a vast selection of natural exfoliants, meticulously crafted from plant-based and mineral sources such as shells, fruits, seeds, herbs, spices, and loofah. These exfoliants provide various colours, textures, and degrees of abrasiveness, making them adaptable to different skincare products and applications. Whether for gentle facial scrubs or more robust body exfoliations, these ingredients enhance the natural appeal of formulations by improving skin texture, promoting radiance, and supporting cell renewal.

PROPERTIES

Walnut Exfoliator is made from finely ground walnut shells.

Walnut trees, specifically *Juglans regia*, have been cultivated in the Grenoble region at the foot of the French Alps since the Middle Ages. These trees grow tall, reaching up to 35 meters, with broad crowns and distinctive smooth, olive-brown bark that becomes silvery-grey with age.

The walnut itself, technically a seed from a drupe, is highly valued both as an edible snack and as an ingredient in skincare. Walnut Exfoliator is known for its natural origin, high abrasiveness, and stability, making it a perfect addition to anhydrous formulations.
