

AQUALGAE PALMARIA

INCI: *Palmaria palmata* extract, *Potassium sorbate*, *Sodium benzoate*, *Citric acid*

AQUALGAE RANGE

Aqualgae is a natural, organic seaweed water sourced from algae harvested on the Brittany coast. It is obtained through a gentle evaporation process that recovers 100% of the water from the algae, making it a sustainable and eco-friendly alternative to pure water in cosmetic formulations. Certified 99.6% natural and 99.1% organic by ECOCERT, it supports local marine resources and circular economies. Aqualgae enhances the natural content of cosmetics, offering benefits for both consumers and the environment by upcycling a previously discarded by-product.

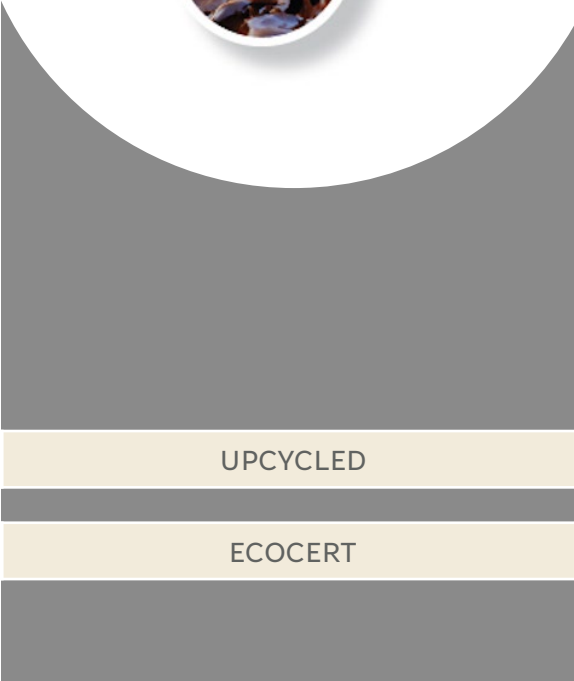

PROPERTIES

AQUALGAE Palmaria is extracted from *Palmaria palmata*, a red algae known for its rejuvenating and draining effects.

Harvested from the North Atlantic Ocean or the North Sea, this biological water is ideal for slimming and toning cosmetic products. It supports skin vitality and helps in formulating products that enhance body contouring and skin firmness.
